

Press Release

Our Commitment to Cyber Security

Cyber security for industrial automation & control system has become a hot topic in a world defined by Internet of Things technology and Industry 4.0. As global industry players increasingly emphasize cyber security, the IEC62443-4-1 cyber security certification for CTC Union's cognitive products will greatly enhance the core competitiveness of its products. The IEC62443-4-1 standard ensures that all stages of the development process from product specifications definition, case review, product design, risk assessment, and test verification to distribution, deployment, and maintenance are strictly enforced and controlled.

With the assistance of Bureau Veritas, CTC Union will soon obtain the IEC 62443-4-1 cyber security certificate. This certification represents that CTC Union runs a rigorous product development process, uses safe design methods throughout, maintains overall control over security and quality, and thus serves customers with high-quality products and services that ensure information security.
