Newsletter

Certified under the IEC 62443-4-1 standard, CTC Union is committed to ensuring the security of industrial information networks.

In the Industry 4.0 era, technologies such as 5G, AI, and the Industrial Internet of Things (IIoT) and applications are developing and spreading rapidly. In this context, information security for industrial control has become an issue of high concern worldwide. As industry worldwide increasingly emphasizes information security, CTC Union Technologies, the globally leading manufacturer of network communication equipment, recognizes that obtaining IEC62443-4-1 certification for its products will greatly enhance the core competitiveness of its products. Its rigorous product development process, strict product development procedures based on the highest standards, safe design methods throughout and good security awareness of all staff led to the decision to follow IEC 62443 certification. This demonstrates that CTC Union Technologies attaches great importance to internal quality control and commitment to the security of customer information.

CTC Union Technologies has recently passed and obtained the IEC 62443-4-1 certification of its network security standards. For the certification, Bureau Veritas performed tests and audits, after which the certification was awarded by the IECEE certification body. The certification is a key standard for network security and is the world's only industrial network security standard valid for all industries. With IEC 62443-4-1 certification, CTC Union's products from the definition of specifications, case review, product design, risk assessment, testing and validation, to release, deployment and maintenance---must implement and control every required step of the development process. This certification also reflects that CTC Union Technologies has a rigorous product development process and is capable of achieving overall control of security and quality aspects, to provide customers with excellent and security-compliant products and services.

About CTC Union

Established in 1993, CTC Union Technologies is a specialized network communication products manufacturer with ISO 9001 and ISO 14001 certifications, its own product R&D team and production plants. The software development system follows the security management standard **IEC62443** to enhance the security protection of our products that are used in many industries. In the spirit of continuous innovation and R&D, CTC Union Technologies provides a full range of high-quality, reliable, heavy-duty and heat-resistant products, including Industrial Ethernet, PoE, **EN50155** and **E-Mark** certified switches. With more than 30 years of experience in designing telecom products under its belt and driven by leading-edge technology and high-quality service, CTC Union Technologies has become a leading supplier of network access switching equipment and FTTx solutions worldwide.
