

Product Highlight

PoE Managed Switch

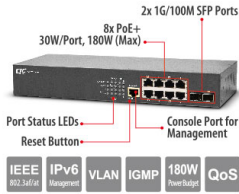

- 8x GbE/RJ45+2x 1G/SFP with 8x PoE+
- Power Budget 180W (max)
- Cable Diagnostics
- PoE Port On/Off Scheduling
- PoE PD Failure Auto Check

GSW3208MP-1

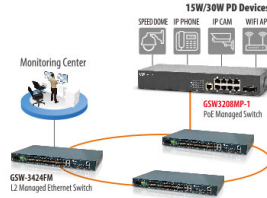

The GSW3208MP-1 is the enhanced version of cost-effective high performance managed power over Ethernet switch, which is equipped 8 GbE/RJ45 with IEEE 802.3at standard 30W power injection per port and 2 dual rate FE/GbE SFP slots. It's designed for enterprise network deployment for office applications such as PoE powered IP telephony, WiFi access and IP surveillance. The GSW3208MP-1 support a wide variety of L2+ feature sets and included the advanced PoE management functions.....[\(more\)](#)

Application

Related Products

PoE Managed Switch

GSW-3224MP

24x GbE/RJ45 + 2x 1GbE Combo with 24x PoE+ (450W) Switch

- IEEE 802.3at/af PoE, up to 30W per port
- Layer 2+ Full Managed Software Features with MSTP, LACP, LLDP, sFlow, 802.1X, TACACS+, and ACL
- DHCP Server/Relay/Snooping
- PD Alive Check
- Automatically adjust Fan speed function

PoE Converter

FMC-1000S-PH

10/100/1000Base-T to 100/1000Base-X SFP with PoE+ (30W) Media Converter

- PoE output voltage up to 55VDC
- Supports IEEE 802.3at/af PoE, output 30W Power Budget
- Supports LFPT (Link Fault Pass Through)
- Supports DIP SW for setting LFPT, Switch or Converter mode, SFP speed
- Supports Jumbo frame 9K bytes packet

[+ more](#)

PoE Converter

IFC-1000PSE

100/1000Base-T to 1000Base-X SFP PoE+ PSE Fiber Converter with 15.4W AC Power built-in

- IEEE 802.3af Compliant PSE
- Supports 4K MAC address
- Forward 1632 bytes (max.) packet
- Supports Link fault Pass-Through (LFPT) function

[+ more](#)

PoE Converter

IFC-100PD

10/100Base-TX to 100Base-FX PoE PD Media Converter

- Forward 1600 bytes (Max.) packets
- Supports Link Fault Pass-Through (LFPT)
- Forward 9K jumbo packets in converter mode
- Supports IEEE802.3af Power over Ethernet

Solutions

PoE Powered Office Automation

The concept of modernized enterprise office is heavily leveraged high speed network environment more and more. It becomes the challenge of the IT department of enterprise for the office layout. It's not only for artistic and orderly purpose but also the centralized management and IP based structured cabling to be considered. There are more factors to be concerned for the office layout such as security, mobility, simplified asset management and energy saving. In some large building, the traditionally UTP cooper cabling have been not able to fulfill the requirements for the IT administrators to well organize the overall office layout.....[\(more\)](#)
