NEW

Key Features

- Standalone IP Based, Web GUI, Telnet, SNMP management
- Supports RMON counter and dying gasp
- Supports local / remote IEEE 802.3ah OAM / IP management

More

Application

The FRM220A-2000EAS/4F features 4xSFP ports which uplink through a 1GbE trunk to the chassis integrated trunk card. With twenty cards in the chassis, up to **80** remote sites may be deployed with in-band remote management for each central chassis. This will double up the number of clients served in 2RU rack space, while reducing the per port costs over the previous FRM220A-1000EAS/X card.
